

Master your Security Operations Center

SOC challenges

! **90%**

of an operator's time is spent dealing with false alarms¹

! **20**

Number of technologies used by a typical security operation center²

! **+50%**

Increase in compliance-driven procedures since 2014³

Connecting the dots with collaborative decision management

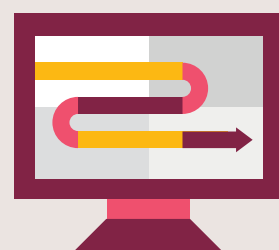

! Unify all your devices and sensors to create situational intelligence and establish relational context between multiple incidents

Leverage a visual workflow builder to automate tasks for efficient incident management

Create user-friendly rules that eliminate false alarms and reduce operator overhead

Provide operators with a common operating picture and on-screen guidance for rapid incident resolution

Ensure regulatory compliance and facilitate forensic investigations with finely-tuned user privileges and comprehensive incident reports

How it works

Mission Control provides collaborative workflows and real-time guidance to all incident management stakeholders:

Genetec Mission Control

"It's encouraging to know that I can handle anything that comes my way now!"

Operator

"I receive real-time updates in emergency situations!"

First responder

"It makes my job safer when I get a complete view of the situation on patrol."

Security guard

"I can now access crucial reports. Identifying risks and providing feedback is much easier."

Compliance officer

"I can ensure that my entire team is performing at their best!"

Supervisor

Genetec
